EXPERIENCE

AlignTogether Solutions Pvt. Ltd.

October 2024 – Present

Software Development Engineer - II

Bhopal, M.P

Vaue First - Surbo Chat | *Flutter, Dart, Firebase, Twilio SDK, BLoC, REST APIs, WebSockets*

- Built scalable cross-platform mobile applications using Flutter with clean and modular architecture.
- Implemented real-time messaging using sockets and integrated Twilio SDK for audio and video calling.
- Integrated native Twilio video calling for Android and iOS, ensuring smooth UI and stable call performance.
- Integrated 100+ backend APIs to support chat, user management, and application features.
- Implemented Firebase Push Notifications for real-time alerts and message delivery..
- Successfully published the app on Play Store and App Store.

Kubocare | *Python, NumPy, Pandas, TensorFlow, Keras, PyQt5, MQTT, Matplotlib, FFmpeg, ExPose*

- Researched and implemented mmWave radar point cloud to human skeleton prediction for posture recognition.
- Built a data processing pipeline to generate a dataset (150K samples) from mmWave radar point cloud recordings for posture recognition.
- Trained a TensorFlow/Keras model to predict human skeletal joints from radar point cloud data.
- Implemented real-time radar data streaming via MQTT to visualize live skeletal motion from point clouds.
- Generated 3D human mesh and skeleton labels using ExPose for supervised model training

Fittr Hart | *Flutter, Dart, Matrix SDK, BLoC, Realm, Firebase*

- Developed modern and responsive mobile UI using Flutter with clean and maintainable architecture.
- Integrated Realm Database for efficient local storage and offline data synchronization.
- Built a full-featured chat module supporting core messaging functionalities.
- Integrated Matrix SDK to enable secure real-time messaging and communication.

Lakshhr | *Node.js, Python, Flask, PostgreSQL, MySQL, AWS Lambda, SQS, SES, Docker, Redis,*

- Migrated 30+ workflows from Airtable to PostgreSQL and built AWS Lambda automations for scalable, event-driven data processing.
- Migrated 30+ business workflows to an event-driven AWS serverless architecture using Lambda, EventBridge, SQS, and SES.
- Implemented SQS-based message queuing and integrated SES for automated email notifications.
- Utilized EventBridge for time-based automation and orchestration of workflows.
- Developed a Node.js backend to manage APIs, data pipelines, and automation logic

PROJECTS

Trimly | *Next.js, MongoDB, Server Actions, App Router*

[Link](#)

- Built Trimly, a secure and scalable URL shortener application with an interactive and modern UI.
- Developed using Next.js App Router with Server Actions for optimized performance and seamless server-side handling.
- Integrated MongoDB for reliable storage and fast retrieval of shortened URLs, ensuring scalability and data integrity.

TECHNICAL SKILLS

Languages: Dart, Python, SQL, JavaScript, HTML/CSS

Frameworks & Platforms: Flutter, Next.js, Node.js, Flask

AI/ML: PyTorch, TensorFlow, YOLOv8, OpenCV, Pandas, NumPy, Matplotlib

Cloud & DevOps: AWS (EC2, Lambda, S3, SageMaker, SES, SQS), Docker, Kafka, MQTT, Grafana, Prometheus

Developer Tools: Git, VS Code, IntelliJ IDEA, Jupyter Notebook

EDUCATION

Sagar Institute of Science and Technology

B.Tech in Computer Science and Engineering (CGPA: 8.38)

Bhopal, M.P

Oct 2020 – May 2024
